**Notice of Discontinuation of Group Packing
for AC Servo Motors with 38 mm & 42 mm flange sizes**

Thank you for your daily support and efforts to our business.

As per title, we will discontinue the group packing of motors with 38 mm and 42 mm flange size.

We would appreciate your understanding and cooperation with this matter.

■ Affected Models: AC Servo Motors of MINAS Series, Flange Size 38 mm and 42 mm

* Excludes Motors with Gear reducer

(Part number)

MSMD□□***** Starting with “M” from the left, the 2nd character is “S” and the 4th character is “D”

MSME□□***** Starting with “M” from the left, the 2nd character is “S” and the 4th character is “E”

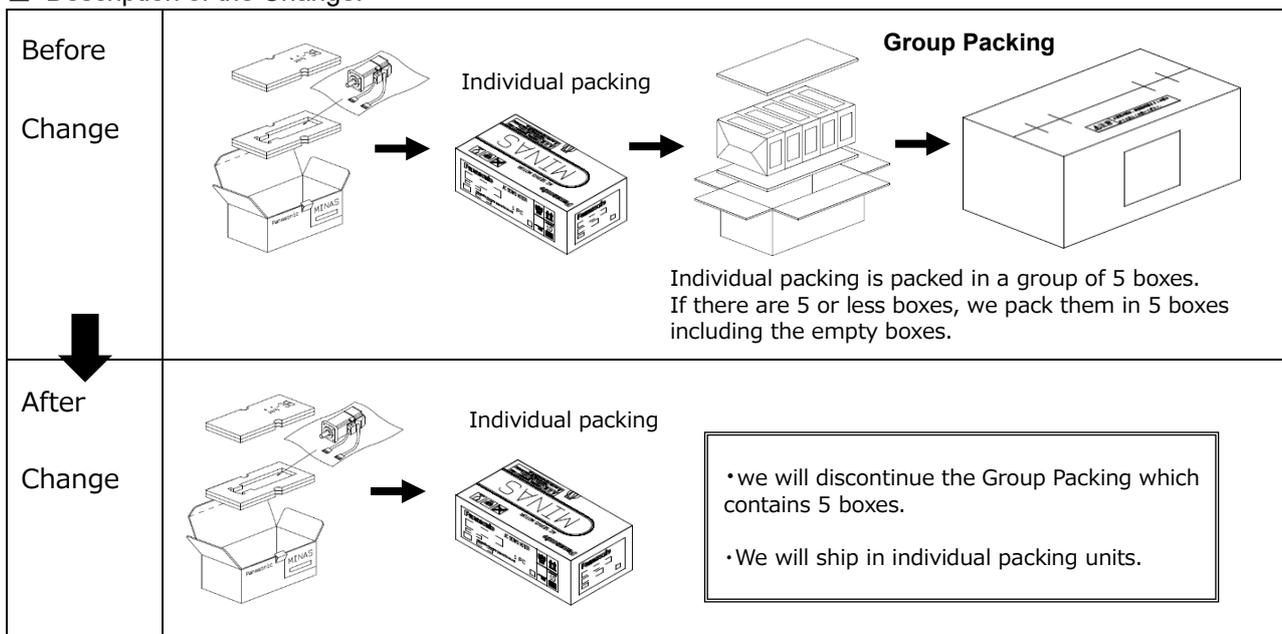

MUM*□□***** Starting with “M” from the left and the 2nd character is “U”

└The 5th and 6th characters are “Motor rated output” (3A: 30 W, 5A: 50 W, 01:100 W)

■ Reason for the change: Productivity improvement

■ Schedule of the Change: From October 2021 production onwards.

■ Description of the Change:

There will be no impact on servo motor’s characteristics, performance, and external dimensions due to this specification change. In addition, there is no change in the product part number.
