**[Important] Product Discontinuation Announcement:  
Separate type Speed Controller MGSD type  
for Compact AC Geared Motors Shin-G Series**

Dear Valued Customers,

As per title, the Speed Controller MGSD type for Compact AC Geared Motors will be discontinued since it is difficult to continue production due to various circumstances. We have been supplying this product for 30 years since the start of the production, but due to aging of production equipment for major components and production discontinuation because of product environmental compliance, we have summarized the final production quantity and secured the necessary inventory. Under such circumstances, we have taken all possible measures to secure further inventory in response to inventory shortage due to a drastic increase in orders from last year, but we have not been able to secure the required quantity.

On the other hand, we have been considering switching to alternative materials, but we have decided that continuous supply is not possible anymore, and we have no choice but to discontinue production.

We sincerely apologize for the inconvenience caused by this notice, but hope to your understanding.

With Best Regards,

■ Discontinued product and recommended substitutes:

• Speed Controller (Separate type) MGSD type

| Part No.. | Input power supply (V) | Applicable motor output (W) |
|-----------|------------------------|-----------------------------|
| MGSDA1    | 100                    | 3 to 40                     |
| MGSDB1    |                        | 60 to 90                    |
| MGSDB2    | 200                    | 6 to 90                     |

• No recommended substitutes.

■ Reason:

Due to the difficulty in continuous supply of products due to the end of production of major components.

■ Final order deadline:

Sorry, but we cannot accept new orders.

In addition, it is also difficult to supply some of the products that have already been ordered.

■ Repair services:

Repair service is not available for Compact AC Geared Motors (including speed controller). Only inspection and analysis are available.

END
